

COMPANY PROFILE 2012

A creative company that is capable of continuous growth.

A corporation that uphold modest materials found in nature by transforming it into objects of design and substance.

We are steadfast in providing clients with the best and innovative products and this mission has enabled us to lead the way in new product directions, design concepts and production techniques.

We endeavor to provide our clients with top of the line design, in which creation of our products undergoes the vital stages of product development from our dedicated designers.

Equipped with our newest facility, our goals include higher productivity as well as to cross borders and reach every horizon to provide excellent and credible service to the world.

What we Believe in

At our company, we don't just aim for quantity but for perfection of our products, progress for our employees and the quality of life we can provide for our customers.

In achieving perfection for our products, our Product Development team continuously searches for new eco-friendly materials and create fresh designs from current materials we use.

Trained professionals in our Production Department carefully guide our crew in their creative process. Close working relationships ensure that quality standards are observed to produce only the best for our clients.

In our quest for perfection, we teach values to our employees in every task we give them because Lacasa Deco believes that excellence starts with our people.

Lacasa Deco believes in nature

Inspired from nature; we use indigenous and eco-friendly materials in creating extraordinary works to cross borders and reach every horizon to provide excellent and credible product and service to the world.

Lacasa Deco is Committed to a Green and Healthy World.

We would like to be a pioneer in the world market in providing exceptional hand-crafted decorative wall panels using indigenous and eco-friendly materials.

Several tests were conducted by Third party in accordance with ASTM E 84 also known as "Standard Test Method for Surface Burning Characteristics of Building Materials ". These test shows that la casa wall treatments have Class A with Flame Spread Index 25 or less and Smoked Developed Index 450 or less. These are standards by which building code officials determine the acceptance of products for interior finish materials.

ASTM D 5582 : 2000 is also known as "Standard Test Method for Determining Formaldehyde Levels from Wood Products Using a Desiccator". This test show that Formaldehyde, known to be a carcinogenic volatile organic compound was Not Detected (N.D.).

EN 71: Part 3: 1994 is also known as "Migration of Certain Elements" where amount of toxic elements analysis (Barium, Lead, Cadmium,

Antimony, Selenium, Chromium, Mercury and Arsenic) are measured. Tests show that such elements detected were very low, ranges from <1 to < 10 mg/kg out of <25 to <1000.

Lacasa Deco assures high quality products by meeting international standard specifications. Continuous innovation and development of products from natural raw material is the main direction of the company's product development team. We are committed to consumer's safety and satisfaction as these are the keys in providing the best service.

Lacasa Deco is Engaged in a variety of activities for the benefit of everyone as well as creating a sustainable society.

The company has partnered with the Department of Trade and Industry in the Philippines to provide livelihood opportunities to marginalised sectors composed of fisher folks, women and out of school youths who are based in the coastal areas of Rizal.

The existing livelihood programs likewise contribute to the cleaning up of the "Laguna Lake and other waterways of water hyacinth which causes severe floods in the country.
