

NATURA

PRODUCT SPECIFICATIONS

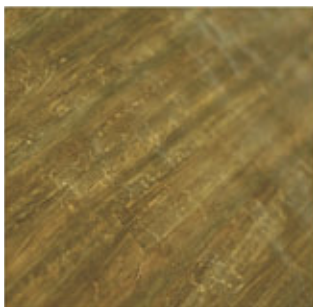

Creativity has turned this plant into a beautiful material for interior wall covering, scrollable for ease in handling and installation. They are light yet substantial.

DESCRIPTION:

Water hyacinth or water lilies are free-floating perennial aquatic plants abundant in the Philippines. It's abundance, however, has proven to be environmentally friendly. Creativity has turned this plant into a beautiful material for interior wall covering.

NATURA is composed of non-woven backing water-based adhesives and coatings. **NATURA** wall coverings are scrollable for ease in handling and installation. They are light yet substantial.

MAIN MATERIAL:

Water Hyacinth

APPLICATIONS:

Interior Wall Coverings
Furniture Surface Material

LIMITATIONS:

Not applicable for areas with direct sunlight and with high moisture such as kitchen and bathroom.

SIZES / DESIGNS:

4 Designs Available
approx. 36 inches x 12 yards height / Repeating: N/A

ENVIRONMENT:

NATURA is derived from natural material. Water hyacinth is comprised of genus eichhornia crassipes that can also remove toxins such as cyanide, arsenic, cobalt, cadmium, lead, and mercury, which is environmentally beneficial in closed areas.

The Department of Environment and Natural Resources (DENR) of the Philippines approves harvesting of water hyacinth to eliminate river and lake clogging.

TESTS / EXAMINATIONS:

In-house fire test - Class A
